The **SafeRack Storage System Safety Audit Training Program** is approximately six hours of classroom instruction along with approximately two hours of practical application that together provide a comprehensive review of:

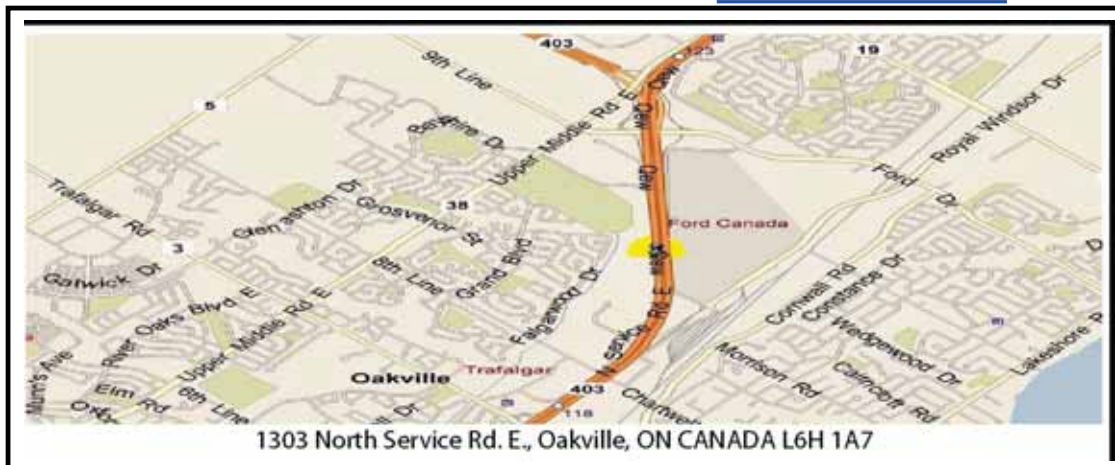

- Current applicable design and installation standards
- Various types of storage systems, lift trucks, pallets
- Basic safety design strategies
- Potential rack hazards
- Rack damage identification
- Hazard classification

**REGISTER TODAY,
 CLASSES ARE
 FILLING QUICKLY!!**

We will introduce examples of audit codes, specifications and procedures to the attendees, and award certificates recognizing the successful completion of both a written quiz and practical test.

The program will provide the resources needed to perform a basic storage system safety audit. The attendees will be able to produce a clear and concise report based on audit codes, regarding the general conditions of various possible storage systems.
